Specialist-led dental clinic

Advanced dental care, designed around people.

Established in 2021, Shining Smiles Dentistry is a specialist-led clinic in Saket, New Delhi. The practice brings together implant dentistry, endodontics and aesthetic care with digital planning, strict hygiene and clear patient communication.

Each treatment plan is shaped around clinical findings, functional needs and the patient's smile goals.

OUR MISSION

To deliver high-quality dental treatment with clinical precision, hygiene, patient comfort and transparent planning.

PERSONALISED CARE / DIGITAL WORKFLOWS

CARE PRINCIPLES

01

Clinical precision

02

Transparent planning

03

Patient comfort

04

Hygiene first

Complete dental care under one roof.

A focused portfolio spanning implant, restorative, cosmetic, orthodontic and endodontic care.

01 Implant Dentistry

All-on-4, All-on-6, immediate, mini and zygomatic implant options.

02 Root Canal Care

Precision-focused endodontic care designed to preserve natural teeth.

03 Smile Design

Digital planning for balanced, natural-looking aesthetic transformations.

04 Veneers, Crowns & Bridges

Custom restorations for shape, strength, proportion and function.

05 Aligners & Orthodontics

Braces and clear-aligner options for structured bite correction.

06 Whitening & Cosmetic Care

Professional whitening and selected aesthetic refinements.

07 Gum Care

Periodontal treatment and support for long-term oral health.

08 Oral Surgery & Rehabilitation

Wisdom-tooth care and comprehensive full-mouth planning.

Treatment selection follows clinical examination, imaging and individual oral-health needs.

Implant and smile rehabilitation, planned step by step.

Complex care becomes clearer when assessment, digital planning, treatment and follow-up work as one pathway.

FOCUSED TREATMENT PATHWAYS

- All-on-4 / All-on-6
- Immediate implant options
- Mini and zygomatic implants
- Full-mouth rehabilitation
- Digital smile design

A CLEAR 4-STAGE CARE PATH

1

Assessment

Clinical examination, medical history review and diagnostic imaging.

2

Digital Planning

Scans and case mapping support implant, restorative or endodontic planning.

3

Treatment

The planned clinical procedure is completed with clear patient communication.

4

Finish & Follow-Up

Aesthetic refinements, maintenance guidance and review support.

DIGITAL SMILE DESIGN / VENEERS / CROWNS / WHITENING

Technology that supports precise, efficient care.

Digital diagnosis and restorative workflows are paired with a clear focus on sterilisation and treatment-area hygiene.

XR

Digital X-rays

Efficient imaging for routine and advanced diagnostic needs.

3D

3D Scanning & CBCT

Detailed digital capture for implant and complex-case planning.

IC

Intraoral Cameras

Chairside visualisation to support diagnosis and communication.

CM

CAD/CAM Systems

Digital workflows for crowns, veneers and restorative design.

LD

Laser Dentistry

Technology supporting selected minimally invasive procedures.

ST

Sterilisation Systems

Instrument processing supported by autoclaves and hygiene protocols.

DIGITAL TREATMENT ENVIRONMENT

HYGIENE BY DESIGN

Instrument processing

Autoclave support

Treatment-area cleanliness

Specialist expertise. One coordinated team.

Experienced clinicians guide implant, endodontic, restorative and aesthetic treatment planning.

15+ YEARS

Dr. Shashank Arora

BDS, MDS – ENDODONTICS & IMPLANTOLOGY

Focus areas include endodontics, implantology, immediate functional loading, microscopic dentistry and digital smile planning.

12+ YEARS

Dr. Anika Bhasin Arora

COSMETIC & AESTHETIC DENTISTRY

Her work contributes to the clinic's focus on smile aesthetics, restorative dentistry and patient-centred care.

Smile aesthetics

Restorative care

Patient comfort

From first enquiry to confident follow-up.

A simple pathway for local and international patients, with practical coordination around the clinical plan.

1

Share Reports

Send available scans, reports and treatment history.

2

Consult & Plan

Discuss clinical needs, options and next steps.

3

Coordinate

Align appointments, travel support and records.

4

Treat & Follow Up

Complete care and receive review guidance.
